u2b50u2b50u2b50u2b50u2b50. I am early into the game and I like very much, I have not seen anything I dislike, and moving the cube is not as simple as it looks because of the colours. Cube will rise if the colour on the cube matches the colour on the floor, and drop if not. This is not easy to do and will give much challenge and is very worth it.. Im recommending this puzzle game because I have to be realistic and say its a good near the end tough puzzle game. What made me stop playing were the levels in witch you are limited by time and that idea in puzzle games in general is awful to me so if you share my opinion maybe you should think about buying this.. Good level design and well polished graphics for a fair price. If you're into puzzle games, you might want to try it.
